Kangal Dog Health and Pedigree Database Data Collection Form

Ver. 2007

Copyright 2008, KDCA

The Kangal Dog Health and Pedigree Database (KDCA P&H Database) is a project of the Kangal Dog Club of America. The purpose of the Database is to carefully develop and make available to contributors a comprehensive Kangal Dog database on dog lineages and health records to aid in the protection and development of our cherished breed.

The project seeks to recruit information on all documented pure bred Kangal Dogs, regardless of registration, from around the world, and to make it available for protecting and developing the Kangal Dog to those involved in its husbandry.

Database operations are guided by the KDCA Kangal Dog Health and Pedigree Database Policy, Version 2007. Data integrity, participant privacy rights, and data access are fundamental issues that are addressed in the Policy and are of paramount concern for this project.

Data Form Instructions

Please complete the form as fully as possible with the best available information. The only information **required** is page 1 and all entries must submit a fully completed and signed copy of this page in order to be accepted.

Attach the requested or required documentation information as indicated. Please attach a copy of your dog's official pedigree if it is registered and also include any extended pedigree information that you can. If your dog is not registered, please include as complete a lineage as you can and as much documentation for this lineage as is available. Providing a copy (photocopy) of the official registration pedigree is required for all registered dogs. The most extensive and carefully documented pedigree information available is required for unregistered dogs.

Please supply one picture of your dog to be included in your database file. Send this as an electronic copy via CD or e-mail them to the Database Administrator if possible. If this is not possible include your photo in your paper submission.

Make a copy of the form for your records and return the signed original with documentation to the Database Administrator. Please contact the Database Administrator with questions concerning this form or the Database. The contact information for the Database Administrator is as follows:

Allen Lebovitz
